

ERP / Business Management

Summary

The aim of this datasheet is to give an overview of the services ADA Technology Services offers around ERP and business management software. Business software services form an integral part of ADA's value proposition and enable our clients to manage their organisations more effectively.

Industry Research

- The market for ERP software will reach \$47.7 billion by 2011 – AMR Research, 2008
- More than 18% of European companies are looking to improve their ERP system by investing to build a new solution – IDC, An End-User Perspective of the European ERP Market in 2008
- The business intelligence market will show a 5-year compound annual growth rate (CAGR), in revenue terms, of 8.6% – Forecast: Business Intelligence Platforms, Worldwide, 2006–2011

Why ADA?

ADA has been helping companies to identify, monitor and manage key business processes for many years through the cost-effective implementation of ERP or business management software. Our consultants work with clients to understand their businesses and provide solutions which increase productivity, control costs, and deliver information that enables faster decision-making. From project management through to training and ongoing support, ADA is able to provide end-to-end consultancy for your software implementation. Importantly, our solutions are fast to implement and give you the opportunity to deliver real benefits and a higher ROI to your business.

Business Drivers

- Increase productivity
- Consolidated data/systems improve reporting and lower costs
- Control/monitor costs

Business Challenges

- Time to evaluate the ERP market to find the right solution
- Costs involved in implementing a new system and evaluating the cost benefit
- Expertise to integrate a new system within the organisation

ADA Software Services

ADA Methodology

Every client has different business software requirements and we work closely with customers to ensure we understand their needs fully and completely. Our software implementation methodology lets us understand and define customer needs from the outset so that we are able to tailor our solution and delivery times precisely. This enables our consulting team to provide the best possible experience for clients and ensures that we deliver in line with expectations. The success of our solutions is often measurable in terms of the business benefits they deliver and ADA is committed to making this a reality.

Company Quality Standards

ADA operates to an ISO9000:2001 standard that incorporates sales, pre-sales, delivery and support. Our commitment to these standards ensures our clients have a consistently high quality and predictable experience with ADA.

Next Steps
