

SharePoint

Summary

This datasheet aims to provide an overview of the collaboration and productivity solutions ADA Technology Services offers around the Microsoft Office SharePoint Server (MOSS) 2007 platform.

Industry Research

SharePoint Server is rapidly becoming the collaboration tool of choice. According to an April 2008 Forrester report*, 96% of organisations are considering or are in the process of deploying at least some part of the Microsoft Office SharePoint Server platform.

**Forrester, Focus: Microsoft Office SharePoint Server 2007, April 2008.*

What is Microsoft Office SharePoint Server 2007?

Microsoft Office SharePoint Server (MOSS) 2007 is an integrated suite of server platforms designed to revolutionise organisational effectiveness. By providing comprehensive content management and enterprise search, SharePoint accelerates business processes and facilitates information-sharing across organisational boundaries.

MOSS 2007 supports intranet, extranet and internet web applications across an entire organisation via one integrated platform. Consequently, MOSS 2007's collaboration / content management modules provide IT professionals and developers with the platform tools they need for server administration, application extensibility and interoperability.

Why ADA?

A Microsoft GOLD Partner, ADA has unrivalled experience in consolidating legacy enterprise content management systems. By helping its clients move from disparate systems, ADA provides the collaborative technologies, optimised processes and procedures which improve business agility. By maximising the flow of information and boosting employee productivity, ADA has helped numerous customers to drive down costs through increased organisational productivity.

Business Drivers

- Information Management – to streamline content and processes
- Platform Consolidation – to remove static sites which exist in isolation
- Efficiency of IT Infrastructure – to reduce time for application development
- Employee Productivity – to improve knowledge sharing
- Business Intelligence – to access information anytime, anywhere
- Business Insight – to enable informed decisions via improved collaboration

Business Challenges

- Business units and colleagues need to communicate more effectively
- IT services are not flexible, secure, manageable or reliable
- Multiple platforms are hindering content management capabilities
- Teams are unable to make informed decisions because data is inaccessible
- A lack of uniformly 'familiar' applications is reducing employee effectiveness

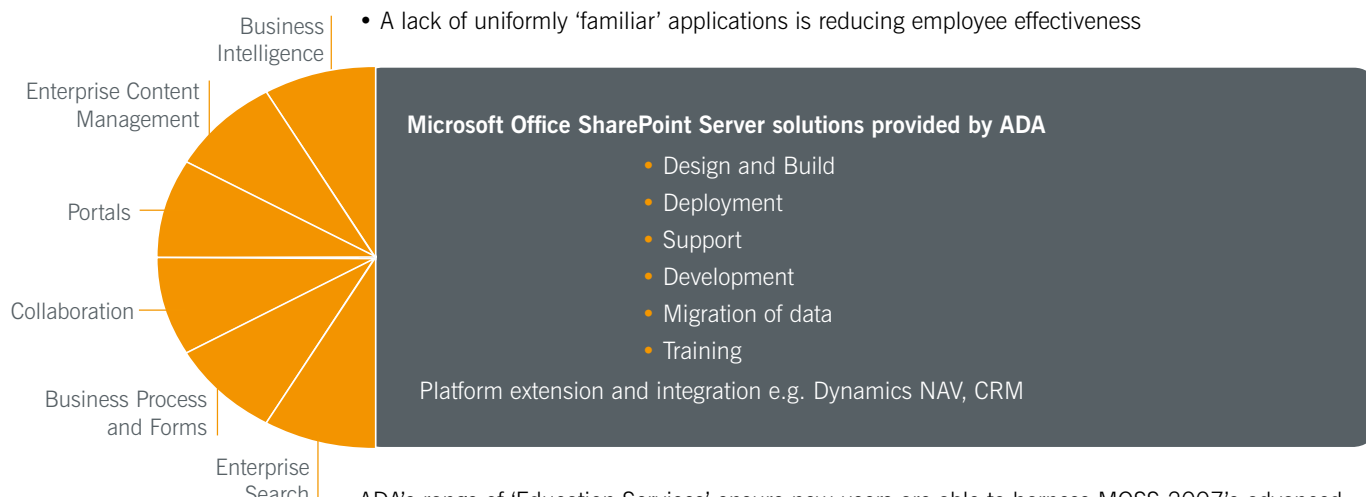

Fig 1: 6 Pillars of MOSS 2007

ADA's range of 'Education Services' ensure new users are able to harness MOSS 2007's advanced functionality immediately after training, thereby maximising the return on investment. This proven methodology allows ADA's clients to integrate their technology and software solutions into their businesses with far greater success.

ADA Methodology

ADA offers a range of collaboration and productivity solutions which manage system complexity, automate low-value tasks and empower end-users to make sense of complex data.

ADA's solutions are based on four key capabilities:

- Enterprise Content Management (ECM) technologies that streamline the management of content and processes
- Pervasive collaborative workspaces via a robust portal framework delivering a suite of social computing tools (blogs, wikis etc)
- Enterprise Search technologies that empower people to quickly find the information they need
- Unified Communication (UC) tools for messaging/scheduling, device management and mobile compatibility

With every solution built on a secure Windows Server OS (running MS SQL Server and MS Office 2007 Stack), ADA's clients are better equipped to manage security, to accelerate deployment and to reduce end-user support overheads.

Company Quality Standards

ADA operates to an ISO9000:2001 standard that incorporates sales, pre-sales, delivery and 24/7 support. ADA's commitment to these standards ensures its clients experience a consistently high quality and predictable service.

Next Steps

To find out how ADA's strategic methodology can reduce your operational costs, empower your people and support new business opportunities, call us on **01444 232000** or visit **www.ada.co.uk**

ADA is one of the UK's leading technology services companies with an enviable reputation for technical excellence, service reliability and industry-leading standards. Working closely with manufacturers and partners who represent the best in the IT industry, ADA sources solutions that offer lasting advantages. Similarly, ADA's consulting and field engineering services are based on an approach that considers your business environment as well as your IT infrastructure, ensuring that your IT delivers real business benefits.
