

ADA Server & Storage Virtualisation Seminar

Date: Wednesday 6 August 2008
Time: 09.30 – 12.30 (followed by lunch)
Location: VMware, Frimley

Virtualisation isn't new – as early as 1960, IBM was experimenting with multiple operating systems running on a single hardware platform. What *is* new is that, after decades of shackling business applications to dedicated hardware, organisations of all sizes now benefit from the flexibility, practicality and improved utilisation offered by virtual systems.

Whether you are new to virtualisation, or have experience and are deciding how to deploy this technology in your environment, this presentation represents a valuable opportunity for you to see and discuss real examples of successful virtualisation. For your convenience, the seminar will run in three concise sessions:

- **9:30 – 10:15 Virtualisation Essentials**
For those seeking an introduction to the technologies and key benefits brought by virtualisation, this session delivers the 'need to know' facts, covering the basics of server, storage and application virtualisation as a co-ordinated strategy. Customers already familiar with virtualisation technologies may choose to join the seminar after this presentation.
- **10:30 – 11:15 Virtualisation into Production**
With many of our customers now running production systems on completely virtual platforms, we will share our experience from the field. From design to deployment, our methodologies are proven, as we guide you through practical examples of real-life virtual solutions for disaster recovery, application delivery and hardware consolidation.
- **11:30 – 12:30 iSCSI SAN: The simple route to VMware deployment**
iSCSI storage allows you to deliver your virtualisation projects quickly, simply and cost-effectively without compromising performance or functionality. During our live demonstration, we will construct a complete working iSCSI SAN environment using EqualLogic's industry-leading storage arrays, exposing the features which deliver tangible business benefits.

About the Venue - VMware

The VMware Headquarters is an extremely popular seminar venue. The extensive access to demonstration equipment and technical specialists is impressive to all delegates.

Book your place now

Please be advised that the event is limited to 12 delegates, to ensure all who attend gain maximum benefit. For further information or to book your seat(s), please call 01444 239500, or e-mail events@ada.co.uk
